

M. P. Möller: Opus 9258

A Four-Manual American Classic Pipe Organ • 1959

FULLY RENOVATED 2024 • \$300,000+ INVESTMENT • UNTOUCHED & UNPLAYED SINCE COMPLETION

A Rare Opportunity

Built by M. P. Möller—America's most prolific pipe organ builder—Opus 9258 is a four-manual American Classic instrument of exceptional scope: 64 stops, 51 registers, and 60 ranks speaking through 3,422 pipes across six divisions.

In 2024, Pasadena Community Church invested more than \$300,000 in a top-to-bottom renovation: every windchest re-leathered, every pneumatic restored, the console rebuilt with new solid-state control, and the pipework cleaned and revoiced. Weeks before the finishing crew returned to tune and voice the completed instrument, a hurricane struck the sanctuary—leaving the building unsafe for public use. The organ itself was untouched by the storm.

Pipework, windchests, console, and electronics remain exactly as the craftsmen left them—complete, and not yet played.

The result is a rare opportunity: a fully rebuilt American Classic organ that is, mechanically and tonally, essentially new—ready for final voicing and installation in its next sanctuary.

The 2024 Renovation

1. Complete refinishing of console and bench: sanding, repairing, sealing, and clear-coating to its original furniture grade finish.
2. Custom control system by Matters, Inc. featuring solid state switching, virtually unlimited memories, sequences, fiber optic connections, and two USB ports.
3. New stop jambs fitted with electro-magnetic wooden drawknob stems.
4. Fabrication of new coupler rail fitted with tilting tablets, solenoids, and electronic control system displays.
5. Fabrication of key slips fitted with usual thumb pistons associated with the American Classic Organ.
6. Replacement of existing pedal board with vintage M. P. Möller unit finished to match restored console.
7. Refurbishment of existing bolsters, swell shoes, crescendo pedal and installation of new toe studs.
8. Replacement of existing plastic keyboards with either original M. P. Möller ivory keyboards (if available) or new ivory reproductions.
9. Electronic optical switching
10. Installation of Great-to-Choir Transfer, allowing Manuals I and II to be played in reverse.
11. New music desk crafted of tempered glass.
12. Installation of dimmable LED fixtures for the music desk, coupler rail, and pedal board.
13. Releathering of 4,000+ pneumatic pipe pouches and primary pneumatic valves with the highest quality sheep leather, produced to exact specifications.
14. Refurbishment of reed pipes: clean resonators, polish internal brass parts, voice, existing tremolo mechanisms, harp, tubular chime, zimblestern mechanisms and façade pipes.

Pasadena Community Church

ST. PETERSBURG, FLORIDA

Opus 9258 is a landmark instrument ideally suited for a large sanctuary, concert hall, or university performance space. With its commanding tonal resources and expressive versatility, it is equally at home in worship or the concert stage.

A fully restored American Classic—preserved, protected, and ready for its next chapter.
